London, England

With a passion for technology and a dedication to security, my journey has been shaped by transformative experiences. Through the EY Secure Futures Programme, I delved into the security sector, collaborating on innovative cybersecurity projects and gaining the confidence to present to senior members. The Wilson James Security Technology Business Experience provided insights into risk assessment and propelled my abilities in presenting improved security measures. At the J.P. Morgan Technology Summer School, I honed technical skills, led AI-focussed discussions, and enhanced teamwork in a dynamic setting. These experiences, coupled with strong academic achievements and versatile skills, empower me to contribute effectively and innovate in the intersection of technology and security.

Experience

EY Secure Futures Programme – ***Intern***

05/2023 – 06/2023

• Institute Of Leadership & Management Approved programme
• 1 week programme learning about security sector alongside companies such as Wilson James, Disney Security, NPSA
• Worked on group projects such as creating a new product idea with employees for the cybersecurity industry and presenting to senior members
• Developed teamwork & communication skills and confidence through presenting in front of audiences and working with other students to create ideas

Wilson James Security Technology Business Experience – ***Intern***

07/2023 – 07/2023

• 4 day programme insight into different departments in the security industry in Broadgate
• Carried out risk assessments on actual hazards on the estate
• Presented different security measures that can be improved to British Land and other managers
• Developed presentation skills and teamwork skills by working on a presentation on how different companies in Broadgate can improve their security measures with technology

J.P Morgan Technology Summer School - ***Intern***

08/2023 – 08/2023

• 5 day programme focussed on the technology sector inside J.P Morgan
• Worked on different coding challenges using Python, HTML & CSS
• Worked in a group creating a presentation on how AI will change the banking industry in the future
• Improved leadership skills by guiding my team and presenting different concepts to be included in the presentation
• Improved communication and teamwork skills by working in a group and dedicating different roles to different group members
• Improved confidence by presenting in front of J.P Morgan employees
